My guess would be that you dont have a proper DNS server entry in your IP config.

Ask your host which one to use.

Alternatively:

Open the hosts file located in C:\Windows\System32\drivers\etc\  
and at the bottom add the line:

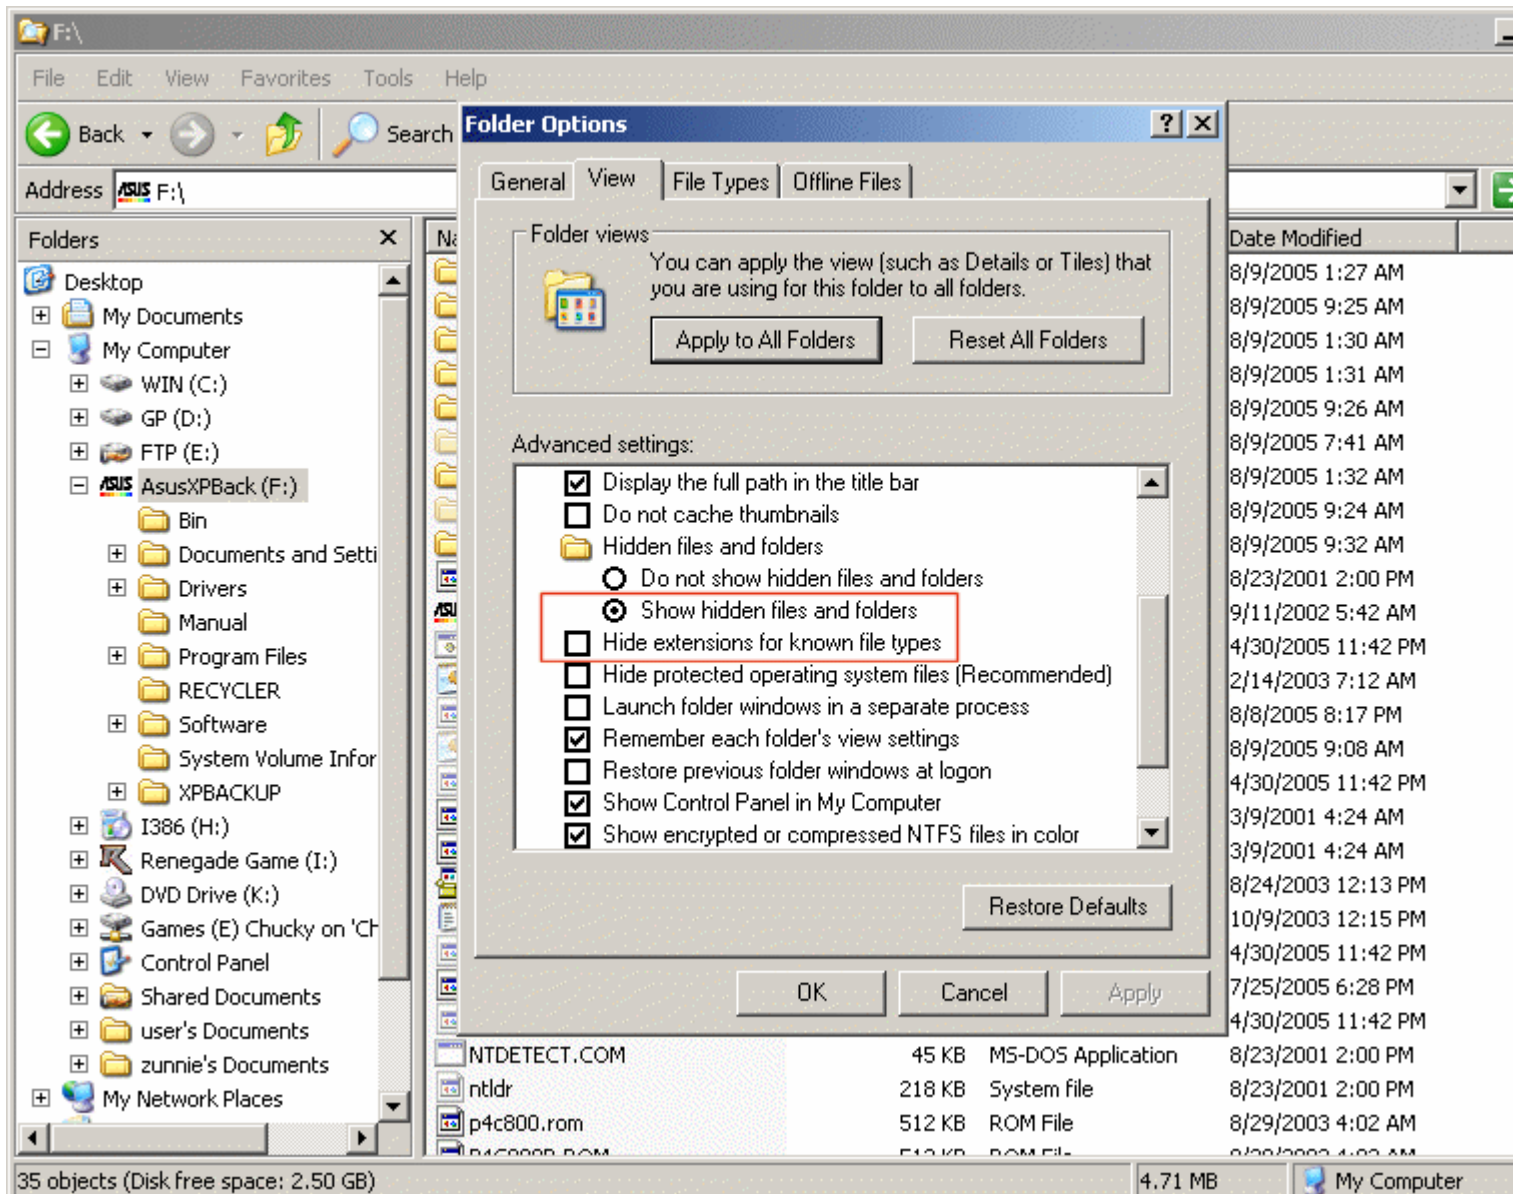

```
159.153.208.23   renchat4.westwood.com
```

Save the file and restart the renegade server.
