Scorpio9a and I proudly present you our network fix for C&C95.
After many years without working C&C95 multiplay (in NT kernel OS'), you can finally do so again!

But remember, this is a beta. Post all bugs you may find in this thread.

You can download it here: http://www.understorm.net/dump/cnc95mp_b1.zip

Have fun playing!

Note: This is EA approved
