Hey,  
Will an option be available for administrators to view live feeds to help stop cheaters?

E.G Admin in IRC, and people complaining of a cheater with wall hacks.

Please DO NOT MENTION RENGARD towards ^^.

I would run renguard on my server, but NR doesnt support renguard at the moment, and only full-renguard is available via the SSC.

Thanks

P.S Great work, Action Script is a cunt, I've used it before.
