You dont deserve respect. How long have you been trying to see if these hacks work? Who are you to demand respect?

AND DONT HACK RETARD!

Don't anger me.

There is a BIG difference between cheating and hacking. Can you guess what it is?

Don't make cheaters sound like they have even the least of intelligence. Anybody with half a brain can find a cheat website, click a download button and open the file.

At least hacking requires levels of intelligence.
