maschief wrote on Sun, 21 August 2005 01:46l have Renguard installed with 1.037 and it gets thru:

[20:40] Trying to connect to server #1...Connected  
[20:40] Secure link established.  
[20:40] Welcome to RenGuard , maschif9!  
[20:40] To launch Renegade, please click 'Renegade'.  
[20:40] Starting Core Patch Pre-Install Check..  
And all the scanning and gets past the "this won't take long" message, but...

Then once it gets to the second window, it will go thru 2 blue bars then freeze. So, of course I can't install renguard core patch 1. Any help on a fix for this would be appreciated.

gen-er-al Pronunciation Key (jnr-l)  
adj.  
1. not confined by specialization or limitation  
2. applying to all or most members of a category or group

dis-cus-sion Pronunciation Key (d-skshn)  
n.  
1. A formal discourse on a topic; an exposition.  
2. an extended communication (often interactive) dealing with some particular topic

Wrong forum.

First of all, it's not Renguard CP1.

Renguard = Anti-cheat  
CP1 = BHS unofficial patch

Second, does your whole computer freeze or just renguard?

If it's just renguard try reinstalling everything in this order:

Renegade > Official Patch > No-CD (if applicable) > Renguard > CP1.

If it's your whole computer freezing then Renguard probably isn't the problem, try a virus check.
