MP servers suck dude. Those mods on them are plain asanine. Everyone accuses myself and my brother of Hacks whenever I go in, just because Im better than most of the noobs who hang out there. Let's replace the med tank with a light tank with all the stats of a Med tank! O wait, that entrance to the cave on Mesa looks bare...hmm...wait, I got it! Let's hang up a giant A-10 there for no purpose or feasable reason for existing at all!
