---

while playing... turn EVERYTHING OFF

MSN = OFF

ICQ = OFF

KaZaA = OFF

Outlook Express = OFF

eDonkey / eMule = OFF

IRC or other chats = OFF

---

Update ALL your drivers.

Expecially your Graphic Card drivers

----

Get DirectX 9.0a

----

If none helped: You could try to change your gamesettings to low or normal instead of HIGH.....  
That usually helps

---
