tz40cal wrote on Mon, 29 August 2005 13:44 Sounds childish to post like this, but I feel better anyways. On the contrary. This is probably one of the most intelligent set of posts I've seen from a newcomer to the forums in the past two months. In addition, you didn't make a typical "omg wtf i got baned 4 xploting rg hap me i didn do et it wuz mah bruddur" bull-jazz. You asked a simply question regarding typical RenGuard (and sometimes CloudyServ) commands and explaining something that someone had accused you of doing. It's this kind of post from a newcomer that should be framed and hung for all to view. (No, that wasn't sarcasm. It's rare around these parts to see an intelligent newcomer.)
