Quote: I know we said, and more specifically I said, that RA would never be revived and that we were going to work solely on the Battlefield 2 project. This isn't the case, and after some careful consideration we've come to the conclusion that working on both projects would help the Battlefield 2 version at the same time

that takes one thing of the things i said above.

last edit: im going to bed then school, cant wait to see your messages when i get home jball im hopeing this time you will have something to stand behind except posting 'im a spammer' in somthing that wasnt spam in the first place please think befor posting jball.it helps you and the whole community.
