As far as I know, our Ontario radio stations have to adhere to a provincial law that says what can or can't be broadcast.

As for the banning of FOX NEWS nationwide (as far as I know; I know it's banned here in Ontario), I'm near positive that is nothing short of a federal quiam to stop the conservatives from getting ideas.

But they have a way of messing up on their own without the federal government's help. It's the nature of the beast-- or whiner, or whatever you want to call it.
