They can do it faster and more efficently than Black Hand Snipers and Sakura units. Same goes for Walls\_Flying. Snipers may have distance, but if you get within range of a Tiberium Flechette Gun/Laser Chaingun, you're as good as grounded.

Uh... What the fuck?

What version of renegade are you playing? It bears no relation whatsoever to the copy I've got. You must have an odd patch, because the Laser Chain-gunners can do a good amount of damage to an Orca. Not enough to kill it quickly, but still. Besides, any good Orca pilot knows how to avoid a Laser Chain-gunner. It's not so easy to do so to a Sniper. The Tiberian Flechette Gun doesn't do a whole lot to vehicles, other than the Humvee and Buggy. And even then, it does very little.
