Your really unhelpful you know. The purpose of this forum area is to ask questions and hopefully get answers. If you don't have something useful to say then don't post.

Why do you need a patch to stop gameplay pending, if it's simply to test maps on your own host a single player LAN game, non dedicated, and that will do the trick.

If you can tell us why you want it there's possibly a better way of doing what you want anyway.
