well it wont let me connect..my other programs work fine! i closed all firewalls including windows..checked for spyware/virus/defragged/reinstalled/rebooted/made new nick/open-closed it like 50 times.....it still wont connect..i was playin fine a couple hours back...i already tried system restore to a day earlier and it still dont work...its fucking gay!

doest anyone know if i need any special ports open for renegade?
