not a wallhack.

I want to create a X-Ray vision, just like James bond: Nightfire.

When you click the right button you will get an X-Ray with a filter (hud.dds)

```
on *:Zoom:DrawViewodel:#{  
function {DrawViewModel}  
}
```

and im gonna change the hudsniper.dds zo it will give a wierd view

but the main question is, how to adress the function?
