I would honestly say that I AM, indeed, addicted to music, but that's neither a bad or unhealthy thing.

As for sex, Clare, I wouldn't call it an addiction or obsession. It's a natural desire that can't be helped. It can be tamed, but you're not going to simply be able to ignore any urges. Believe me, I've tried, but there's just no getting around hormones. Also, who says I do that a lot? I haven't in over a year...
