Puppy if i may add this one last bit. I used to despise the people who would bank on it as a way to keep the server free of people who were simply better then them. There were a few servers (who shall remain nameless) who would !forcerg anyone who would happen to be better then the majority of the server.

With any program or game or for anything for that matter there stands a chance of abuse, it's that abuse i had a problem with. Not the program.
