Quote: This post is to notify all those that have posted in this thread, that I have lied to you. Yes, I have downloaded a 'really old bypass' and attempted to use it...solely to see if it actually worked (admittedly I had my doubts). Knowing me as well as many of you do, I do hack, but only to better myself as a moderator. This is what I was trying to do, as the HT servers never ran RG and I have seen evidence that it can be hacked, I wondered was it really that easy? I had no idea of the consequences - shows how much I know about Renguard. I extend my sincerest apologies to Crimson, and offer her my best wishes with her future endeavours.

Here's another example:

You're a cop. A crime investigator. You go ahead and murder some people. You do this and claim it better your abilities with your job as you know now how a murderer thinks. Would the court be okay with this, or would you be jailed? Not a hard question.

There are way too many people defending themselves the same way you did. To all of them: if you want to study the cheats on your own so you could "identify them better", set up a LAN game. If you can't, then don't. Leave anti-cheating attempts to those who can, and are dedicated at fighting cheaters, like BHS.
