Blazer wrote on Thu, 03 November 2005 13:38why wait for 1.04? The option is there now in 1.03

Because of a few of the bugs that will be fixed on 1.04, plus I won't be playing in a clan match until 1.04 is out, so why download an inferior version. (Saves having to update too)

I'd prefer for it not to load the site at all. If I deny RenGuard access to port 80 using my firewall, will this cause any issues other than not displaying the website?
