Oh god yes. Nobody should play like that. I'll admit that during FPS games I've neglected food for several hours, even when given food, but atleast I stop every once in awhile to keep from getting stomach pains from not eating, and cramps from not moving.
I'll also admit that I've had times when playing a game that I don't move from my seat for anything other then drink and bathroom breaks, but that's not nearly as bad as not eating for several days. I am sorry that a fellow gamer died, and I don't want to come off as an asshole, but that was ignorant of her. Neglecting food and sleep for a game, albeit World of Warcraft, is a very stupid thing to do.
Though I'm not really one to talk. 36 hour non-stop Halo marathon. I'm just glad I was the base defender, or else I would have wet myself a few times.
