I got on Gamespy and found a co-op server, played it and quit a minute or so later. I went back and picked another server, and hit Renegade. However, instead of starting, it spit this message out:

[13:21] Your attempt to use the lan-exploit has been logged and will be reviewed.
[13:21] Disconnected from RenGuard network
[13:21] Unauthorized Renegade instance terminated

wtf? It didn't do that 5 minutes ago, and I don't even know what the lan-exploit is!
