Once you've done that install the program if it asks to register dont worry its only going to be needed once, click on the 'Copy CD' icon and make yourself an ISO, once you have managed to complete this task download a program called Daemon Tools Link :

[h\\*\\*p://www.afterdawn.com/software/cdr\\_software/cdr\\_tools/daemon\\_tools.cfm](http://www.afterdawn.com/software/cdr_software/cdr_tools/daemon_tools.cfm)

Install that mount yourself a CD Drive and you'll have Renegade on your computer 24/7.

If that still doesnt work then sorry i am out of ideas at this moment, sorry.

I think the ISO won't work as Ren has anti-copy-protections which will make the iso (which is a copy of the cd actually) not work I THINK.
