You can create a clan in XWIS = The WOL management thingy = useless.

Just go to Chat typ /reg and it will give you a link to the Tiberian SUN and Renegade clan creation. But as far as I know, the ingame tags don't work..

As for the funwars.. most of the time NoN00bs played against other community's it turned out like Spoony said. GF for example they wanted a fun war but it ended up with them all leaving they were getting owned and started calling us cheaters (so much for the funwar). If you wan't to get a good clan get active in Clanwars.cc manual league. If you start a more of community clan which doesn't really play cw's then dont play the clans from clanwars because it won't get owned.
