clans compete against one another. communities all join the same tag and play in public servers all day, which is what people NOT on the manual league do. i can pretty much sum up what clans NOT on the manual league do all day:

1. make a server called " *GENERIC NOOB CLAN* Recruiting "
2. get some dumbass n00bs to download ts and join their "clan"
3. rent a public server and play in it all day
4. when people come in asking for a clan war, they dodge.
5. when people better than them wanna play in it, they go crazy !forcerg !rg !kick !kb or "OMG WTF TEST NOW"

oh and tbh, no "clan" on WOL/XWIS that ISNT on the manual league, has a very slim chance of beating one that is. and to be even more honest, clans that join the manual league from WOL/XWIS tend to get liek 300% better.
