Olaf van der Spek wrote on Mon, 21 November 2005 01:55Did you discover the cause already?
This is the server list now:

This is the server list when we were on WOL:

I can't find any reason for the high ping. I assume the 996 figure signifies a timeout, but I don't know why my server is timing out on the ping when it didn't before.

The screenshot shows a window titled "Advanced Listings" with a dark background and a large, faint map of a game world in the background. At the top, it says "Connected To: XCC WOL IRC Server", "Login: Crimson", and "Speed: Lan/T1 bps". Below this is a table of server listings. The table has six columns: "Icon", "Host Name", "Game Name", "Game Map", "Players", and "Speed". The "Speed" column contains ping values in parentheses, with red and green circles indicating connection status. At the bottom of the window, there are four buttons: "Back", "Page Buddy", "Refresh", and "Join Game".
