Ok heres my issue, every time I play renegade I play for about a few hours than I leave and right when I hit quit renguard like freezes renegade which in return freezes my computer to renegade screen. Than I get the error report after I finnaly get it unfroze after about 5 minutes of messing with it. Any idea how to fix it. Also if it may be this, I have edited renegade so you dont need to have any confirmation messages, which is done through regedit of course,could that be the problem??
