For a few days i've had problems with renguard so much so one night I removed it to play.

I've reinstalled again now but am being kicked from servers for having a corrupted game2.exe or game.exe I can't remember.

In the server it says kicked for cheating but I am not. I haven't been banned but i'm wondering what's going on .

I don't want to reinstall renegade if I can help it. Maybe I should uninstall rengaurd replace my game.exe with a new one that's no cd cracked and then resintall rengaurd?

Or is this problem resolved now?

Thanks
