If it is saying "corrupt game.exe", then turn off the auto-launch Renegade option. Then, when you want to play Renegade, launch RenGuard... wait about 10-20 seconds, and then click the "Renegade" button. The corrupt game.exe is cause by RenGuard not having finished scanning your Renegade installation for cheats by the time you join a server. So, the obvious solution is to allow it more time.

If it's a "bad/corrupt game2.exe", then be sure that you are using either the official 1.037 version of Renegade, or that you are using one of the authorized no-cd cracks for Renegade.
You can download one of the authorized no-cd cracks here:
