---

1. Un-install Renegade, do this through the un-install program from your Renegade: C:\westwood\Renegade\uninstll.exe. (Make sure nothing stays behind in C:\westwood\Renegade.)
2. Re-install Renegade.
3. Download the 1.037 patch here:  
[ftp://ftp.westwood.com/pub/renegade/updates/Renegade\\_1037\\_En\\_english.exe](ftp://ftp.westwood.com/pub/renegade/updates/Renegade_1037_En_english.exe)
4. Download the No-CD here:  
<http://www.game-maps.net/index.php?action=category&id=79>
5. Replace the game.exe in your C:\westwood\renegade directory with the game.exe you downloaded.
6. Run Renegade just to check everything works.
7. You can download Renguard [Here](#).
8. You can download CP1 [here](#).
9. You can download the latest scripts.dll [here](#)
10. Open it and only select scripts.dll and bhs.dll.
11. Open up your main Renegade folder (C:\westwood\renegade) and look if there is a scripts2.dll, if there isn't then rename scripts.dll to scripts2.dll.
12. place the 2 selected files in your default Renegade folder.

Then play on-line, to register a nick you need to make up your own nickname and password in the "login" box.
