Definitions of trench coat on the Web:

A military waterproof coat invented by the British trade at the request of the British War Office during World War I. Overcoats soaked with rain and mud were too heavy and uncomfortable, normal raincoats inadequate. Tested against hose-pipes, the proofed material was double thickness across the back and high storm collars buttoned tight across the front via special straps. Various metal hooks and D-rings allowed the hanging of equipment, and a tradition was created.

A trench coat is an enduringly popular item of clothing worn round the world. It is generally made of heavy duty cotton, drill or poplin, and has a lining which can be removed depending on the weather. It is a descendant of the heavy serge coats worn by British and French soldiers in World War I. The classical trench coat was a creation of Thomas Burberry, inventor of gabardine fabric, who submitted in 1901 a design for an army officer's raincoat to the UK War Office. ...
