Thank you Sir!

Got Ren re-installed, renguard in place and back in business!

Much fun! It wasn't much fun when all I did all the time was test scripts and not just play anymore

Question though, where does a guy find renguard approved reticles, sounds etc?

I wanna change my reticle to the hunter's reticle, change the silenced pistol to the sound of the Halo 1 pistol, and change the miniguns to the sound of the minigun on the warthog in Halo....
