---

after so many times i played renegade with renguard on, one day i clicked renegade shortcut and renguard comes up with a window pops up and says some thing about fire wall.

i decided to reinstall renguard but it wouldnt let me uninstal ,so i moved the file Game2 and uninstaled renguard and put the file back again ,but i couldnt instal renguard any more

my problem is the renguard setup ALWAYS removes renguard,infact i didnt even instaled it and it always wants to remove it.

i reinstaled renegade but the renguard setup always removes renguard and i cant instal renguard.
