SEALokay.

i used a ripped barbed wire model from field. it looks fine when you look at it from an angle, but when you look at it head on, it looks bad.

heres a pic: <http://www.crypticwarning.com/matt/barbedprob.JPG>

and to answer people's first question, yes, 2-sided is checked off.  
hope you can help, thanks

2 sided has to be checked "on" not "off"

or you could use the model i just uploaded ^
