Chronojam wrote on Mon, 19 December 2005 09:59It's not well edited or else the part where the buggy gets stuck wouldn't have been included, and the random short clips of no value wouldn't have still been there. There's at least one part where it quickly just shows an infantryman between the action close up and to no effect, as if it was left in accidentally. Or was it purposeful? Either way it's bad editing o_O

Well, I rather see them creating something and testing than editing some video clip, don't you?
