Hello again

Got the other probs fixed but now when i play the ctf servers when the flag is taken the voice that used to say "nod has our flag" or "gdi has our flag" and the flag dropped and picked up sound fx are no longer working.

Ive got cp1 and run rengaard and have renegade 1.037

Is there a file i need to dl to get these sounds back????

It makes it hard to play because unless i see the text at the top of the screen i dont even know the flag is taken.

Thanks for any help
