trooprm02 wrote on Sat, 24 December 2005 15:14 Problem with that...

1. My renport is set to zero in server.ini so what do I do?
2. It says, "Warning, Saved RemoteAdminIP doesn't match detected IP,(my ip)"

Suggestions?

Thanks for the help.

REMOTE ADMIN IP MUST BE 127.0.0.1 OR ELSE BRENBOT WILL NOT LOAD!

Suggestions?
