Cobalt wrote on Fri, 30 December 2005 20:11How can you say i'm wrong...you think you're right???? Listen, using RG or NOT you can cheat, if you get tested when using RG anyway you've just proved my point even more. You're making yourself look an idiot by trying to out smart me with RG rofl.

How did I prove your point? You can get tested whether you have RG or not. They are the same. What was your point? that people get tested? Whooptee fucking do. Think of RG as this, if you must. When you're playing a moderator is going to look at if you're using RG first. If you "fail" that part of the test he'll move onto the next, which would be testing you. Next would be screenshots. Get it?

Quote: And, I should note Sniper, it is possible to abuse !forcerg (in most servers) to a level that is NOT POSSIBLE with any other !command ... !forcerg should be MODS ONLY, if not that, then it should be either a teampoll or globalpoll with a 2/3rds majority required for the force to take place...P.S. RG is beginning to suffer from feature creep too...

Of course it's possible to abuse it. It's possible to abuse !votekick as well. That same server I was talking to you about they tested me? People voted to kick me some maps later.(this being after i was tested and sent screenshots AND had RG) as for mods only being able to. What would the point of that be? They'd just ban if they thought it was a cheater. The fact remains there is no real reason to not use RG unless you have a problem with it and you can't install. (Which, like i said, you COULD ask for help..) At least for forcerg i can be sure i can forcerg out a cheater when there isn't a mod to ban him.

If you guys can find a valid reason why not to install Renguard other than it doesn't work for you or somehow slows your computer down (i doubt it, what are the chances, especially when you probably run 50 programs in the background). Then I might see a reason why you'd be right to complain about being force rg'ed.
