Playing Renegade without RenGuard is like being a female and having sex without a condom -- do you trust the guy doesn't have an STD or do you use something that's 99% trustworthy (condom/RG) and minimize your chances of getting something? To me someone saying "I don't need to use RG, you know I don't cheat" sounds a lot like "C'mon baby, it just doesn't feel right when I wear a rubber... you can trust me, I'm clean!"

If you respect the server owner who's allowing you to play on their server, then use RenGuard/a rubber.
