I got tired or idiots who always type "!rg Alex" each time I kill them(especially when they stupidly stand still and wait for a headshot). I am a fair player and don't want to be banned only because a noob said that I'm a cheater... and i don't want to get back to that crappy WinXP from my Win2K...
If you care to play at our server, plz leave a little message on our forums (see siggy) to be sure that we OR let you play, OR kickban you (if you cheat) but not use forcerg .
