Hehe, just make sure you don't get a PCI video card.

EDIT: How much are you thinking about spending? I got bored and went there to customize a PC to see how much it would cost. For \$960 USD you get:

AMD Athlon 64 X2 3800 (Dual Core)

MSI K8N NEO4-F nForce 4 Chipset SATA Raid PCI-E w/GbLAN, 7.1 Audio

1024MB (512MBx2) PC3200 400MHz Dual Channel DDR MEMORY (Corsair Value Select)

nVIDIA Geforce 6800 256MB PCI-E

80GB Seagate SATA150 7200RPM 8MB Cache Hard Drive

Xplorer Mid-Tower Case WINDOW & LCD Temperature Display

NZXT PF-500 500Watt Power Supply

LG GWA-4161 16X DVD±R/±RW + CD-R/RW DRIVE DUAL LAYER

No monitor

No OS

I'd say that's a pretty damn good deal on a website like that. That's definitely comparable to Newegg. And dual core processors ROCK.
