Man I love public forums.

The simple fact is if you know how to use a tank, you can beat almost any other tank.

I have taken a med tank out with an apc, no lie, with full health.

Light tanks are as fast as an apc with a turret, if you can drive it correctly med tanks are easy to take out, because the turret doesn't turn fast enough to keep up with the speed of the light tank.

If you just sit there and trade rounds a med tank will beat you every time, if you move and time the med's firing, you can beat the med on a consistent basis. It's really not that hard, just takes practice.

Oh and if you don't know who aircraft killer is, you're missing out, some of us have been playing Ren before Clanwars existed.
