Sn1per XLyea thats why i dont tell people some codes like how to make tanks invincible and how to make flying harvesters they kill anything in 1 hit and kill PTs.

The flying harv part is abit.....weird (attaching a harv to an apache or something?)....?  
Invincibility is easy to do actually. It's one script. Turns out we had the right script, we just had to keep shooting to realise that it doesnt blow up at zero health!
