I've managed to set up a server so you guys can play on the maps while I'm at work. It doesn't seem to use a lot of bandwidth, so I don't think the admin will care if I let it hit 8 or 16 players or so.

I'll have it up occasionally on weekdays, somewhere roughly between 4pm EST and 11:30pm EST.

It's up now, hosting rome.
