Ripping fun? LMAO... You should join Nopic.

Compare with CloudyServ.

All that was changed was the command name and the text of some commands. LOLOL!

What had me cracking up the most is the way the commands were renamed. CS has them in alphabatized order in the Cmds.ini. Basically left the order the same and just renamed it.

For example, where !csmsg and !demod use to be at, it was replaced with !unmod and !wsmsg LOLOL!
