Blazer wrote on Tue, 24 January 2006 18:58 You can still only hear the sound when the tank gets close to you (I think 50 "meters"?). You are better off spraying random fire with your pistol or minigun to spot stealth units

Not really, if I would be at the AGT on Hourglass and the AGT would be down, then I hear every Stank passing through from the left or right side.

But, it's fun to change the Humm-Vee "idle" sound to Bohemian Rhapsody.
