This corrects a crash that could happen if you call the ID console command and there is a null nickname. Also, it fixes another issue to do with bad data being sent to the client somehow (It doesnt fix the data sending, it just prevents the bad data from crashing the client I hope)

get it from http://www.sourceforge.net/projects/rentools/

If you are using scripts.dll 2.3 or SSAOW 1.4.1, you can just replace bhs.dll/bhs.so/bhs8.so and it will work.
Otherwise, install the new scripts.dll/bhs.dll/etc as usual.
