Ahhhhh OK, I must apologise about the previous stuff I have written.

I use 2.1 and you mean it would only enable the ssaow support if ssaow 1.4 or higher is installed (because older version dont use the ssaow.ini).

So in fact I'm using ssaow 1.34 means I must downgrade to NR 0.20 to have the ssaow support because I don't have the ssaow.ini? I understand now...
