You probably screwed up your Westwood online components and therefore you can't join WOL.

Ever set up the FDS? Because if you did so and uninstalled it, your Client cannot connect to WOL anymore. No matter if the FDS has had it's own Westwood online dir or not. The Renegade FDS removes/redirects some important registry entries while being uninstalled.

If you lost the CD, just goto Ebay and buy a new Renegade? Otherwise you can try to fix the Registry values with tools like Norton Windoctor or others like that.
