Quote: i thought this was simple enough, but i guess not, as some people were saying "my installer isnt working"

extract EVERYTHING in the zip to any folder, then run setup.exe

>>>>(DO NOT UNDER ANY CIRCUMSTANCES OPEN NightRegulator.CAB)<<<<<

>>>>(IF YOU OPEN UP NIGHTREGULATOR.CAB, YOU WILL NOT RECIEVE ANY TECHNICAL SUPPORT, AS NR WILL FUCK ITSELF OVER AND IT WILL BE YOUR FAULT!)<<<<<

If when you load NR it will not accept your FDS directory, make sure the directory has a trailing slash \ at the end, if this does not help, run register.exe in the NR directory and try again
