---

I got the first decade today and It forced me to uninstall previous instances of Renegade. So when I tried to re-install Renguard to my Command and Conquer First Decade/Renegade directory Renguard gives me this error:

"You must install Rengaurd to your Renegade Directory!"

This should be a quick fix in coding if this is the case, just allow another pathway for Rengaurd to be installed to.

If there is already a way to install it, the explanation would be greatly appreciated.
