This is not a new problem, but I'm asking for help for it now.

My internet connection is a 128 up and 128 down <----- (problem?).

I do remember one time when I was able to play on a server like n00bstories without warping all the time. But what I want to know is, is there any way to fix the lag I am experiencing? (w/o getting better internet I don't have a job and my parents won't pay for better internet)
